What is Kibr?

Abdullah ibn Mas'ud reported: The Prophet, peace and blessings be upon him, said, “**No one who has the weight of a seed of arrogance in his heart will enter Paradise.**” Someone said, “But a man loves to have beautiful clothes and shoes.” The Prophet said, “**Verily, Allah is beautiful and he loves beauty. Arrogance means rejecting the truth and looking down on people.**”

In another narration, the Prophet said, “**No one who has the weight of a seed of faith in his heart will enter Hellfire.**”

Python Print Function and Strings

Injecting a variable into a string

String Formatting methods

So what is String interpolation?

String interpolation is a process substituting values of variables into placeholders in a string.

Two methods for string interpolation

`.format()`

And

f-strings

Float formatting follows “{value:width.precision f}”
